

Spring, 2008. Frontiers in Medical Research (FMR) Seminars will be held every week in Kiewit Auditorium from noon to 1 pm. The weeks will alternatively offer a translational presentation with two speakers presenting the clinical and basic science and a datablitz presentation of speakers outlining their research.

Contact Hours	DATE	SEMINAR TOPIC	SPEAKERS
1	1-22-08	Class Day	Anne Cress, PhD, Instructor
2	1-29-08	Cardiovascular Research	Vincent Sorrell, MD Ray Runyan, PhD
3	2-5-08	Prostate Cancer Research	Bruce Dalkin, MD
4	2-12-08	Prostate Cancer Progression and Mechanisms of Bone Pain	Tamara King, PhD Raymond B Nagle, MD, PhD
5	2-19-08	Potential Mechanism for the Global Epidemic in Diabetes	Sree Nair, MD, PhD Mayo Clinic, Minnesota
6	2-26-08	Cancer Research	Dan Theodorescu, MD, PhD University of Virginia
7	3-4-08	Making Blood Vessels to Organs	David Bader, PhD Vanderbilt University
8	3-11-08	Systems Approaches to Marker Guided Therapy	Joe W. Gray, PhD Staff Scientist, Life Sciences Division Director, Ernest Orlando Lawrence Berkeley National Laboratory, UC Berkeley
	3-18-08	Spring Break	No class
9	3-25-08	System Bioinformatics: Integrating information	Nirav C Merchant, PhD Michael F Hammer, PhD
10	4-1-08	Cardiovascular Research	Tom Doetschman, PhD Paul Krieg, PhD
11	4-8-08	Drug Discovery Targeting the Redox Achilles Heel of Melanoma	Georg Wondrak, PhD
12	4-15-08	Retinal Epithelial Cells and Parkinson's Disease	Brian McKay, PhD Scott Sherman, MD, PhD
13	4-22-08	Functional Neuroimaging of the CNS: Promise and Potential	David Borsook, MD, PhD Harvard University
14	4-29-08	Novel treatments for Stroke	Leslie Ritter, PhD, RN Janet Funk, MD
15	5-6-08	Diabetic Retinopathy	Martin Friedlander, MD, PhD Scripps Research Institute
